

Grill-service Special

We clean, service and restore grills for all leading manufacturers.

The Lanai Grill is your most expensive cooking appliance. For Owners and Guests alike, it is the centerpiece of Island Lifestyle and in-residence leisure. Few things state 'vacation' as clearly as 'surf-n-turf' while watching the Hawaiian sun set.

Though we cook atop the grill surfaces, it is below grill that makes it all possible.

Clean grates is fraction of a clean grill. Few Owners clean below the Grill.

The Grill's interior once shined like its exterior.

If the interior is now carbon black, imagine condition of firebox parts.

When excessive food debris and grease builds up underneath the cooking grates, your fresh food is being steamed with months of old carbonized food debris and grease. Deep cleaning removes fats and grease that cause flares and failures.

You'll be amazed what de-greasing, deep cleaning, and component adjustments can make to the grilling performance.

We remove all the contents of the firebox down to an empty shell.

Then all the grease, carbon and debris is removed from the individual parts.

We deep clean the bare box, and the hood as well (steam, bio-degradable solutions).

Once thoroughly cleaned, everything is put back together for proper operation and functionality.

\$150

Special Rate for HOA Owners only

We do not need anyone home as long as we have access to the grilling area.
